Full-stack developer with an extensive background in the wine industry. Currently enrolled in a full-stack development bootcamp through the University of Washington, with an eye towards utilizing these skills to provide web solutions for the Washington wine industry. I create dynamic and responsive web experiences for my client's customers. My goal for each project is to provide a smooth, consistent and satisfying user experience that is both powerful and intuitive. I'm eager to bring these skills to a results-oriented team that is single-mindedly focused on creating excellent customer experiences.

Technical Skills

Languages: Javascript ES6+ / CSS3 / HTML5

Applications: GitHub

Tools: Node, jQuery, Bootstrap, Materialize
